Dr. Jeffrey Kane presents

The Growth of the Mind

Tuesday, March 6th

Bonner Hall

6:30pm - 8:00pm

a light dinner will be served

Each of us hopes that in addition to being healthy and happy, our children develop the intellectual capacities that will make them competitive in a changing world. Under the circumstances, we think it best to teach them as much as possible as fast as possible to build a strong foundation. However, our capacity for clear, powerful and insightful thinking is not constructed like a building or developed like a computer program. The growth of the mind is most well assured by nourishing the tacit principles that unfold into creative and integrative thinking. This evening we will explore the fundamental principles underlying the growth of the mind and how Waldorf education uniquely builds upon them.

We look forward to seeing you!

Jeffrey Kane, Ph.D., is a parent of three alumni; Gabriel '99, Emily '01, and Jesse '05 and is the husband to former Early Childhood Chair Janet. He has been a member of the Waldorf School Board of Trustees since 2002, and for the past 16 years has served as the Vice President for Academic Affairs for Long Island University. With a Master's degree in Waldorf education and a doctoral degree in philosophy, Dr. Kane has written about the philosophical foundations of Waldorf education and the nature of human thinking. His present research focuses upon the limits of computational models of thinking and broad scope of the emergence of the human mind.
